**NURSERYMEN AND
LANDSCAPE GARDENERS**

Catalogue for 1926

BROS **Brooks Nurseries**

MONROE. N. Y.

WM. G. BROOKS, PROP.

Introduction

LOCAL NURSERY. BROOKS NURSERIES is essentially a local business for the purpose of furnishing fruit and ornamental trees, shrubs, vines, roses and hardy perennial plants to the people of Orange and surrounding Counties. In this respect it resembles the local grocer, butcher, druggist or doctor. These are the people on whom you depend for your every-day needs. You know their reputation for honest dealing and dependable service. You are not gambling.

Of the thousands of varieties of trees and plants grown by nurseymen there are only a few hundred which may be called staple or dependable under a wide variety of soils and climatic conditions. Of these dependable trees and plants **BROOKS NURSERIES** usually have a good assortment of sizes. Beside the staple varieties we are continually trying-out the new things offered by the trade. Many of them are unsatisfactory and local people ordering from mail-order nurseries are more than likely to find that some tree or plant which "does Wonders", in some other part of the country is a total failure here. Among the new things which we have tested and proven to be worthy are Ibolium Privet, Japanese Yews, Concolor Fir, Douglas Fir, Schwedler Maple, Bechtels Crabapple, many new varieties of Apples, Grapes, Peonies, Iris and Gladiolias.

KNOWLEDGE AND SERVICE. A good sound working knowledge of the thousands of varieties of deciduous and evergreen trees, fruits, vines and plants, flowering shrubs, rock-garden-plants, aquatic plants, old-fashioned hardy perennials and annual flowering and vegetable plants together with a knowledge of those that grow in wet places, dry places, in shade or sunlight, also of soils, fertilizers, planting, insect pests, fungous diseases, pruning and spraying is not to be expected of the average home owner. This service is to be obtained from your local nurseyman and in most instances without cost. You pay little or nothing extra for it when you purchase from a local nursery but you may pay very dearly for it in mistakes when buying from a highly illustrated catalogue of a mail-ordered nursery.

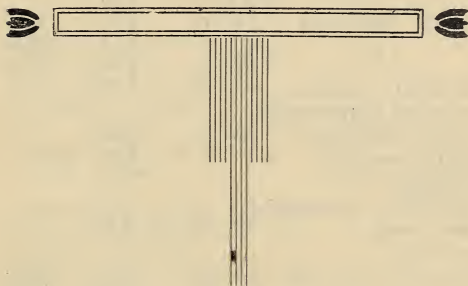

DEPENDABLE TREES. All trees and plants now growing in our nursery are acclimated and do not take a year or two to adjust themselves to a new environment before they start to grow. A local nursery cannot be expected to carry a complete assortment of all possible varieties and sizes of trees and plants because the local trade could not use them. But your local nurseryman knows where they may be obtained and through the American Association of Nurserymen knows who the dependable growers are so that by ordering thru your local nursery you get dependable stock true to name, free from pests and are not personally bothered with the interstate quarantine laws. If it is an extensive planting and carload lots are to be used a substantial reduction in price can be offered.

OTHER SERVICES—Nursery work is seasonal and during the dull seasons of winter and mid-summer a certain amount of pruning can be done. We have renovated many neglected orchards in Orange County and pruned shade and ornamental trees in many of the surrounding towns.

During the spring we keep a power-sprayer busy doing custom spraying. We usually have a supply of spray materials on hand for the benefit of customers.

HISTORY.—This nursery was originally started by J. R. Brooks in 1905. In 1912 it was taken over by his son, the present owner, Wm. G. Brooks. In 1918 he enlisted in

the army and his brother, A. H. Brooks conducted the business until his return. It was then incorporated under the name of BROOKS BROS. NURSERIES. In 1921 A. H. Brooks discontinued his Interest to go to Harvard to pursue the course leading to the degree of Master in Landscape Architecture. This he received in 1924 and now has a local office here at Monroe. My father, J. R. Brooks and my uncle, George W. Brooks, each have greenhouses and grow vegetable and annual flowering plants. BROOKS NURSERIES grow and deal in a general assortment of hardy perennial trees and plants and can furnish the plant materials required for any size job.

SHADE TREES
